README.markdown

JSZip

Build Status

Code Climate

Selenium Test Status

A library for creating, reading and editing .zip files with JavaScript, with a lovely and simple API.

See <https://stuk.github.io/jszip> for all the documentation.

```
var zip = new JSZip();

zip.file("Hello.txt", "Hello World\n");

var img = zip.folder("images");
img.file("smile.gif", imgData, {base64: true});
```

```
zip.generateAsync({type:"blob"}).then(function(content) {  
    // see FileSaver.js  
    saveAs(content, "example.zip");  
});  
  
/*  
Results in a zip containing  
Hello.txt  
images/  
    smile.gif  
*/
```
